

SKILLS: React, Redux, Ruby, Rails, RSpec, JavaScript, MongoDB, Node, SQL Postgres, Firebase, HTML5, CSS3, Git, jQuery

PROJECTS:

ROBERTHOOD *Ruby on Rails, SQL Postgres, React, Redux, News API, IEX Cloud API, Rechart API*

[live](#) |

[github](#)

A financial app that enables real-time stock price search and displays the result in graphical form

- Used ES6 syntax for implementing project logics and building a scalable and responsive app.
- Built numerous components in front-end development using ReactJS.
- Used ajax and React Hooks to retrieve stock and news data and render stock data into a graph in order to improve user experience.
- Made ajax requests from unexpected routes in rails.
- Convert JSON data into readable format using JSON.stringify.
- Fine-tuned several CSS effects on forms, buttons, search box, nav bars, and list items.

NSTOCK *MongoDB, Express, React, Redux, Node, React Google Map*

[live](#) |

[github](#)

An inventory app that allows users to submit inventory report based on Google Map locations

- Collaborated with a team using the Git version control system where I was solely responsible for the Google map customization and rendering.
- Added script to allow Google map to re-center the page and place markers based on search location.
- Added script to display info window based on click events.
- Used geocode to generate app critical location specific information.

RECIPES DB *JavaScript, WebPack, EDAMAM API*

[live](#) |

[github](#)

A database app that can generate recipes from categories such as meals, breads, cakes, cocktails, or beers

- Used Adobe XD to wireframe the project structure.
- Configured EDAMAM API axios requests to return 100 recipes per search.
- Added pagination so that 10 results are displayed per page.
- Setup WebPack to bundle JS, SCSS and image files.
- Used CSS 3 to add customizations and special effects to various HTML5 elements.

EXPERIENCE:

Business Owner

New Fully Bakery, Inc.

Sept 2012 – Jan 2020

- Led a team of 5 members in design and manufacture of specialty cakes, cakes, breads, muffins and cookies to meet high quality standard and timely deliveries.
- Interacted with various government agencies to ensure the store is 100% compliant.
- Coordinated deliveries of orders to various commercial customers across New York, New Jersey, and Ohio.
- Took the initiative to design and host WordPress, Instagram, and Facebook websites for the store in order to increase marketability.
- Added UberEats restaurant partner app that optimized acceptance of online orders.

EDUCATION:

AppAcademy – 2020 – 1000-hour coding school with an admissions rate below 3%, which emphasizes coding style, pair programming, and best practices.

University of Maryland at College Park – *MBA Information Systems, 2005–2007*

New York University – *BS finance, 1995–1998*
